

Phoenix Associates, Inc.

Discovering Boundaries

The Discovering Boundaries Program is designed for children who have displayed inappropriate sexualized behavior. The program generally consists of eight focused sessions and the objectives include learning appropriate boundaries with regard to sexuality and touching, encouraging open communication about sexuality with parents and caregivers, learning to get interpersonal needs met in appropriate ways and developing a behavioral contract to avoid situations that make inappropriate sexual behavior more likely to occur. The program is open-ended and starts with a phone call to schedule an assessment.
